

Vision West

Most health funds allow one claim only for glasses, or up to maybe two or more sets of contact lenses every 12 months (depending on the individual funds policy).

Most health funds also reset their annual claiming period at 1 January each year. Which means, if an optical claim is not made during that period, it's lost.

So, if you require new glasses or contact lenses and haven't made a claim since 1 January, come in and see us before 31 December.

It is also possible to make another optical claim first thing in the new year. This is particularly handy if you require more than one pair of glasses.

It's time to use it before you lose it!

Claim up-to \$300

from your health fund rebate before December 31st
